## Projects

---

### **React portfolio** | JavaScript, HTML, CSS

Built personalized website to showcase completed projects; resume linked.

### **Hitchhiker-s-Guide-Travel-App-** | JavaScript, HTML, Free Forex API, AirLabs API

Created a website to assist with travel plans. Used APIs for incorporating flight data and a currency converter. Website eases preparation for all types of travel.

### **Library database** | JavaScript, CSS, HTML

Created an online library that directs users to the best new age books according to the reader. Books can be located by genre, user management. Used library API and Cloudinary to display book covers.

### **Progressive-web** | JavaScript, CSS, HTML

Built a text editor web application that allows users to create notes without an internet connection. It is designed to be run using npm commands. The application employs IndexedDB for immediate database storage, enabling users to save and retrieve content even after closing and reopening the text editor.
